

1. Open <https://175.136.235.145>
2. Just ignore the https warning, click Advanced and proceed to the site (if chrome don't have option to proceed, please use Ms Edge)

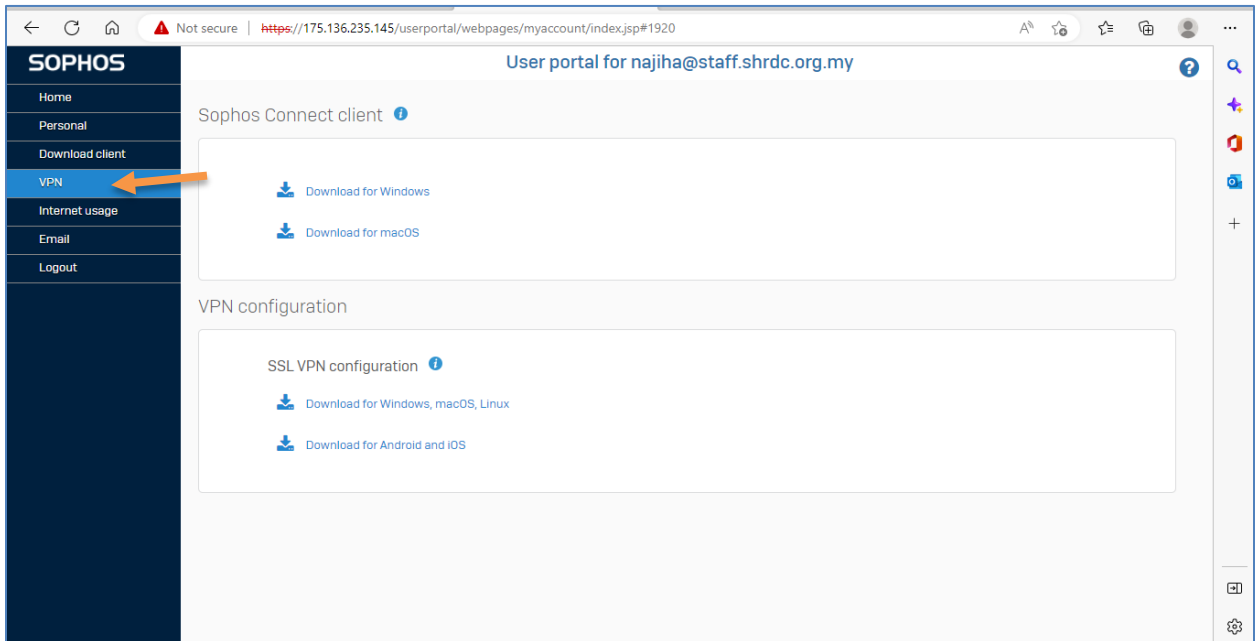

3. Key in this user logon.

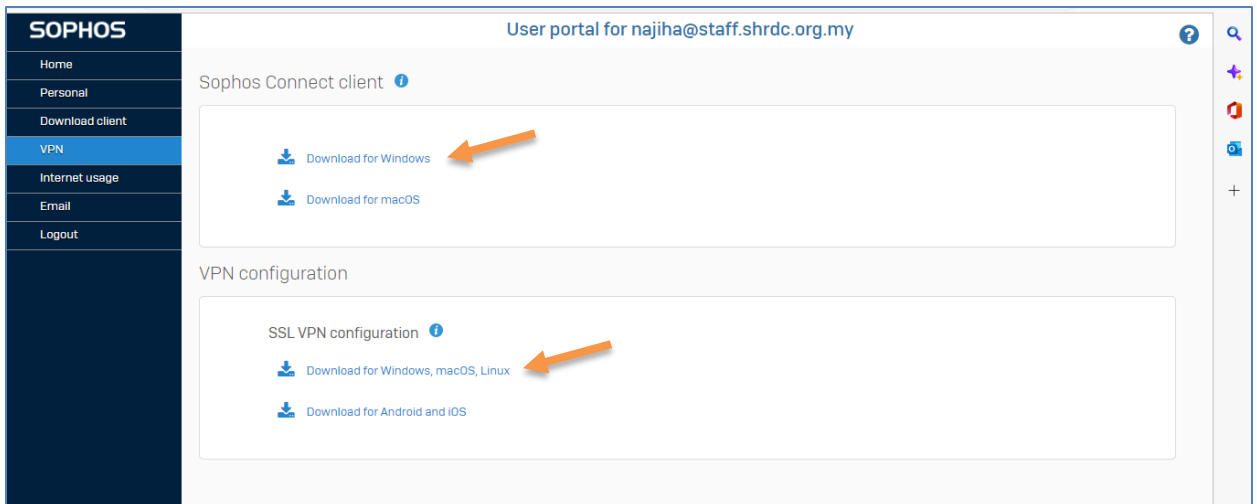

Username : <login pc> Password : <pwd> and Capthca (if outside shrdc network)

A screenshot of the SOPHOS User Portal login interface. The left side is a dark blue sidebar with the "SOPHOS" logo at the top. Below the logo are the labels "Username", "Password", and "CAPTCHA". The "Username" field contains the text "najiha". The "Password" field is masked with dots. The "CAPTCHA" field shows a distorted image of the text "2099mq" with a small "C" icon to its right. Below the CAPTCHA field is the text "Enter the CAPTCHA code" and an empty input field. At the bottom of the sidebar is a blue "Login" button. The right side of the interface is black with a large blue icon of two stylized people. Below the icon, the text "User Portal" is displayed in white. At the very bottom left of the sidebar, the text "© 2022 Sophos Ltd" is visible.

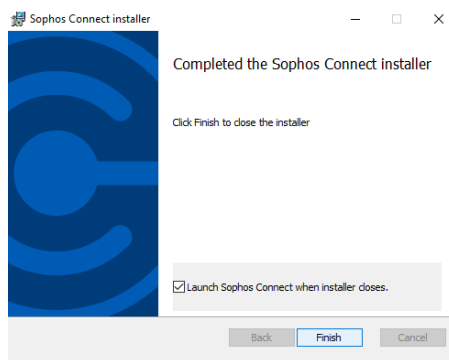

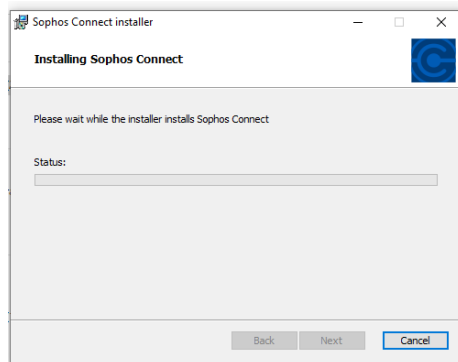

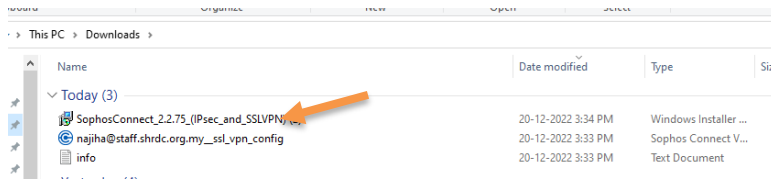

- Click VPN.

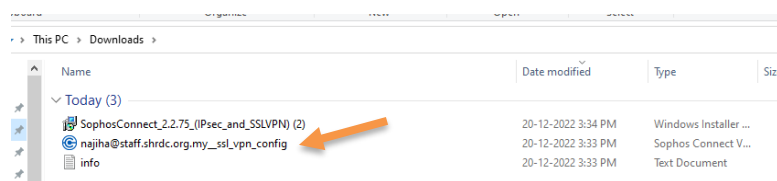

- Download Sophos Connect Client
- Download Configuration file (select suitable version for your pc/laptop/android)

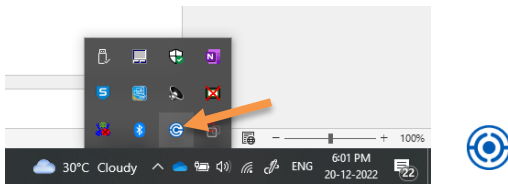

7. Install Sophos Connect Client from download folder and complete onscreen instruction
